Professional Summary

Full Stack Developer and Team Lead with 7 years of experience, experienced in PHP/Laravel backend development and modern frontend technologies Like VueJs. Practical Experience in building robust, scalable web applications using both backend and frontend technologies. Extensive experience in various databases, microservices architecture, and DevOps practices. Skilled in developing high-performance systems and creating smooth user interfaces. Experienced in setting up and managing CI/CD pipelines, Docker environments, and leading development teams.

Technical Skills

- **Backend:** PHP, Laravel, Golang
- **Frontend:** HTML5, CSS3, JavaScript, Vue.js, jQuery, Bootstrap, Livewire
- **Databases:** PostgreSQL, MariaDB, MongoDB, InfluxDB
- **Caching:** Redis
- **Message Brokers:** RabbitMQ
- **DevOps:** Docker, Docker Swarm, Git, GitLab CI/CD, Docker Registry
- **Architecture:** Microservices, Event Sourcing
- **Testing:** Unit Testing, Feature Testing
-

Professional Experience

Backend Developer & Frontend Developer | *February 2023 - Present*

Arzinja | <https://arzinja.info>

- Developed backend systems for a crypto exchange platform using PHP/Laravel.
- Created a responsive admin panel using Vue.js with modern UI/UX principles
- Implemented microservices architecture for efficient pair synchronization and price management.
- Utilized RabbitMQ for inter-service communication, particularly with the match engine.
- Managed multiple databases including PostgreSQL, MariaDB, MongoDB, and InfluxDB.
- Implemented Redis caching to enhance application performance.
- Employed event-sourcing architecture to improve scalability and enable asynchronous operations.
- Created extensive unit and feature tests to ensure code quality and reliability.

Stack | PHP, Laravel, Vuejs, Websocket, Docker, RabbitMQ, Event Sourcing, PostgreSQL, MariaDB, MongoDB, Redis, Jira

Full Stack Developer | *April 2024 - October 2024*

Reunion marketing | <https://www.reunionmarketing.com>

- Developed a data analytics platform that provides businesses with insights about their performance and competitors based on Google Analytics data.
- Built responsive admin panel and customer-side interfaces using Vue.js
- Created features to extract, process, and display complex data sets from Google Analytics, enhancing user understanding of their business metrics.
- Implemented data visualization features using Google Maps API, allowing users to view geographical representations of their business data.
- Optimized database queries and implemented caching strategies to handle large volumes of analytics data with minimal latency.

Stack | PHP, Laravel, Vuejs, Docker, MariaDB, MongoDB, Redis, Asana, Google APIs

Full Stack Developer and Team Lead | *January 2018 - September 2024*

Dyacopardazesh

- Led backend development team, overseeing project execution and code quality.
- Created educational portals and exam platforms using Laravel.
- Developed multiple frontend and portal interfaces using Laravel Blade, HTML5, CSS3, Bootstrap, and JavaScript
- Designed and implemented backend APIs and database structures.
- Set up and managed a self-hosted GitLab instance for version control.
- Implemented CI/CD pipelines to automate testing and deployment processes.
- Configured and maintained Docker registry for efficient image management.
- Orchestrated deployments using Docker and Docker Swarm for scalability and easy management.
- Mentored junior developers and conducted code reviews to ensure best practices.

Stack | PHP, Laravel, HTML, CSS3, Bootstrap, JavaScript, Docker, MariaDB, PostgreSQL, Redis, Trello, CI/CD, Swarm, Docker Compose

Full Stack Developer | *June 2021 - January 2023*

BerNet | <https://nobaar.com>

- Developed backend APIs using PHP/Laravel for various projects, including a vehicle and worker hiring app (Nobaar).
- Created admin panel using Laravel Blade with Bootstrap
- Created admin panel using Livewire
- Implemented microservices architecture for efficient real-time price with multiple map providers.
- Implemented asynchronous order handling using Laravel queues and Redis.
- Optimized complex pricing calculations and real-time reporting capabilities.
- Designed efficient database schemas and optimized queries using MySQL views.

Stack | PHP, Laravel, Livewire, HTML, CSS3, Bootstrap, Docker, MariaDB, Redis, Trello

Backend Developer | *November 2021 - January 2022*

Zhaket | <https://www.zhaket.com>

- Contributed to building a marketplace platform using PHP/Laravel for the backend.
- Designed and implemented backend architecture and APIs.
- Developed caching mechanisms using Redis for improved performance.
- Worked with MongoDB for NoSQL data and PostgreSQL for relational data management.

Stack | PHP, Laravel, Docker, PostgreSQL, MongoDB, Redis, Jira

Full Stack Developer | *June 2017 - May 2020*

RungAndRoll

- Refactored an e-commerce platform from Magento2 to Laravel.
- Implemented backend logic and integrated with third-party stores.
- Created responsive frontend and panel interfaces using Laravel Blade, HTML5, CSS3, and Bootstrap
- Utilized Redis caching to boost application performance.
- Optimized backend processes for improved PageSpeed scores and SEO.

Stack | PHP, Laravel, HTML5, CSS3, Bootstrap, JavaScript, Magento 2, WordPress

Education

Bachelor's Degree in Computer Science

Arak University | January 2013 - September 2017
